Planet Protector

Planet Protector

EASY CLEANING WITH ANTIBACTERIAL WIPES

This multiuser touchscreen game transforms a task that we're all too familiar with—tossing away rubbish—into a fun and meaningful sorting challenge.

As items float along the ocean current on the gameplay screens, players must determine which bin the rubbish belongs in before it floats away. Sorting categories include landfill, hazardous waste and recyclables. Points are gained for every item that is tossed into the correct bin and every item removed from the beach. Planet Protector is a timed challenge and players have 90 seconds to clean up the shore as quickly as possible, to earn the title “Planet Protector”.
